Budget 2023 Reaction: Kotak Mahindra Asset Management Company MD lauds 'Baahubali budget'

Dr. Rupa Rege Nitsure, Group Chief Economist, L&T Financial Services: "While the Budget is market-friendly in terms of every asset class, it reflects good fiscal prudence on the back of subsidy rationalisation. As in the past three years, its underlying macroeconomic framework and revenue growth assumptions are conservative and realistic. A strong capex push by the Central Government was the need of the hour. But its objective will be fulfilled if and only if the State Governments as well as the private sector start raising their fixed investment spending. A push to growth without compromising the macro-financial stabilisation should improve India's score in terms of fiscal sustainability."
